

ABSTRACT OF THE DISCLOSURE

A signal selection apparatus according to one aspect of this invention comprises a plurality of digital signal input terminals, a signal processing
5 unit having a video display unit and configured to process signals input from the plurality of digital signal input terminals and to output the processed signals to the video display unit, an input state
10 detection unit configured to detect input states of signals to the plurality of digital signal input terminals, and a selection/supply unit configured to select, when the input state detection unit detects that signals are input to the plurality of digital
15 signal input terminals, an input signal input to the digital signal input terminal, which is designated in advance, and supply the selected input signal to the signal processing unit.
